SUMMARY

Recent computer engineering graduate seeking to contribute with fresh perspectives. Proficient in HTML, CSS, Java, Python, and web development methodologies, showcasing strong analytical skills. Led a team to develop a successful mobile application during academic tenure. Committed team player with effective communication and adaptability.

SKILLS

Languages: HTML5, JavaScript, CSS3, Java, Python, C++, C, MySQL .

Technologies: Web development, ChatGPT, Black Box AI, Blender, Figma, Framer, Unreal Engine.

PROJECTS

App Development **My Dietitian App**

I am currently working on My Dietitian app empowers users with nutrition insights, protein content details, and curated recipes for healthy meals. Additionally, it includes a handy water reminder feature to promote hydration, ensuring users maintain a balanced and mindful approach to their diet and well-being.

Web Development **Pathology Lab**

I Developed Lab Tests Online is a streamlined web platform enhancing access to patient lab reports, minimizing manual efforts, and providing on-the-go functionality. The system ensures efficient data storage and retrieval, promoting high accuracy and reliability. With a focus on reducing redundancy and optimizing storage space, this project offers a cost-effective solution, addressing limitations of manual systems within a short development timeframe.

Web Development **Car For sale**

Car for Sale is a demo website showcasing a collection of superb cars available for virtual exploration. While it does not facilitate actual car purchases, the platform provides an immersive experience, allowing users to browse through a curated selection of high-end vehicles. This demo offers a glimpse into the world of luxury cars, highlighting their features and specifications without the intention of real transactions.

C++ Program **Library Management System**

The Library Management System, developed in C++, offers an efficient solution for organizing and managing library resources. With features such as cataloging, borrower management, and easy retrieval of information, the system enhances the overall library experience. Its user-friendly interface ensures smooth operation, providing a robust solution for librarians to streamline tasks and improve accessibility for patrons.

EDUCATION

7/2021 - 2024	Diploma Shri Chhatrapati Shivaji Maharaj College of Engineering	--%
6/2015 - 4/2021	SSC Shri Changdeo Vidyalaya Narayandoho	85%

EXPERIENCE

7/2023 - 9/2023	Internship I completed an internship at Rajavi Technology Pvt Ltd, where I gained practical experience and contributed to various projects within the team. Throughout this internship, I collaborated with team members on tasks and projects, gaining exposure to the workings of a professional environment. This opportunity allowed me to develop and apply skills relevant to the field. I am proud of my contributions during this period, reflecting my dedication and adaptability in a real-world work setting	Rajavi technology pvt ltd
